Consolidated Statement of Financial Condition

Piper Jaffray & Co.
(A Wholly Owned Subsidiary of Piper Jaffray Companies)
June 30, 2010

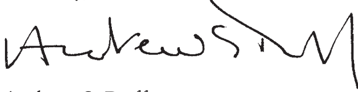
PiperJaffray®

Dear Client:

The following information outlines the financial condition of Piper Jaffray & Co. We have approximately $1.6 billion in assets and are capitalized with approximately $583 million in equity capital. As described in the notes, we have $241.9 million in net regulatory capital and have exceeded the minimum net capital required under the SEC rule by $240.9 million.

At Piper Jaffray, we are focused on building the most trusted global investment bank, connecting capital with opportunity to create a better future. As we state in our Guiding Principles, serving you is our fundamental purpose. We value the trust you have placed in us and look forward to furthering our relationship with you.

Sincerely,



Andrew S. Duff
Chairman & CEO

Piper Jaffray & Co.

Notes to Consolidated Statement of Financial Condition as of June 30, 2010 (unaudited)

NOTE 1. BACKGROUND

Piper Jaffray & Co. (the "Company") is a wholly owned subsidiary of Piper Jaffray Companies ("Parent Company"). The Parent Company is a public holding company incorporated in Delaware and traded on the New York Stock Exchange ("NYSE"). The Company is a self-clearing securities broker dealer and investment banking firm registered under the Securities and Exchange Act of 1934 and is a member of the Financial Industry Regulatory Authority ("FINRA"). As such, the Company trades and effects transactions in listed and unlisted equity and fixed income securities, underwrites and conducts secondary trading in corporate and municipal securities, acts as a broker of option contracts and provides various other financial services.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The consolidated statement of financial condition includes the accounts of Piper Jaffray & Co. and all other entities in which the Company has a controlling financial interest. All material intercompany accounts and transactions have been eliminated. The Company determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity ("VIE").

Voting interest entities are entities in which the total equity investment at risk is sufficient to enable each entity to finance itself independently and provides the equity holders with the obligation to absorb losses, the right to receive residual returns and the right or power to make decisions about or direct the entity's activities that most significantly impact the entity's economic performance. Voting interest entities, where the Company has a majority interest, are consolidated in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 810, "Consolidations" ("ASC 810"). ASC 810 states that the usual condition for a controlling financial interest in an entity is ownership of a majority voting interest. Accordingly, the Company consolidates voting interest entities in which it has all, or a majority of, the voting interest.

As defined in ASC 810, VIEs are entities that lack one or more of the characteristics of a voting interest entity described above. With the exception of entities eligible for the deferral codified in FASB Accounting Standards Update ("ASU") No. 2010-10, "Consolidation: Amendments for Certain Investment Funds," ("ASU 2010-10") (generally asset managers and investment companies), ASC 810 states that a controlling financial interest in an entity is present when an enterprise has a variable interest, or combination of variable interests, that have both the power to direct the activities of the entity that most significantly impact the entity's economic performance and the obligation to absorb losses of the entity or the rights to receive benefits from the entity that could potentially be significant to the entity. Accordingly, the Company consolidates VIEs in which the Company has a controlling financial interest. For more on ASC 810 and VIEs, please see "Consolidation of Variable Interest Entities" under Adoption of New Accounting Standards below.

Entities meeting the deferral provision defined by ASU 2010-10 (generally asset managers and investment companies) are evaluated under the historical VIE guidance. Under the historical guidance, a controlling financial interest in an entity is present when an enterprise has a variable interest, or combination of variable interests, that will absorb a majority of the entity's expected losses, receive a majority of the entity's expected residual returns, or both. The enterprise with a controlling financial interest, known as the primary beneficiary, consolidates the VIE. Accordingly, the Company consolidates VIEs subject to the deferral provisions defined by ASU 2010-10 in which the Company is deemed to be the primary beneficiary.

When the Company does not have a controlling financial interest in an entity but exerts significant influence over the entity's operating and financial policies (generally defined as owning a voting or economic interest of between 20 percent and 50 percent), the Company accounts for its investment in accordance with the equity method of accounting prescribed by FASB Accounting Standards Codification Topic 323, "Investments—Equity Method and Joint Ventures" ("ASC 323"). If the Company does not have a controlling financial interest in, or exert significant influence over, an entity, the Company accounts for its investment at cost.

Use of Estimates

The preparation of the statement of financial condition and related disclosures in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the statement of financial condition. Actual results could differ from those estimates.

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and highly liquid investments with maturities of 90 days or less at the date of purchase.

In accordance with Rule 15c3-3 of the Securities Exchange Act of 1934, the Company, as a registered broker dealer carrying customer accounts, is subject to requirements related to maintaining cash or qualified securities in a segregated reserve account for the exclusive benefit of its customers.

Collateralized Securities Transactions

Securities purchased under agreements to resell and securities sold under agreements to repurchase are carried at the contractual amounts at which the securities will be subsequently resold or repurchased, including accrued interest. It is the Company's policy to take possession or control of securities purchased under agreements to resell at the time these agreements are entered into. The counterparties to these agreements typically are primary dealers of U.S. government securities and major financial institutions. Collateral is valued daily, and additional collateral is obtained from or refunded to counterparties when appropriate.

Securities borrowed and loaned result from transactions with other broker dealers or financial institutions and are recorded at the amount of cash collateral advanced or received. These amounts are included in receivables from and payables to brokers, dealers and clearing organizations on the consolidated statement of financial condition. Securities borrowed transactions require the Company to deposit cash or other collateral with the lender. Securities loaned transactions require the borrower to deposit cash with the Company. The Company monitors the market value of securities borrowed and loaned on a daily basis, with additional collateral obtained or refunded as necessary.

Interest is accrued on securities borrowed and loaned transactions and is included in other receivables and other liabilities and accrued expenses on the consolidated statement of financial condition.

Customer Transactions

Customer securities transactions are recorded on a settlement date basis. Customer receivables and payables include amounts related to both cash and margin transactions. Securities owned by customers, including those that collateralize margin or other similar transactions, are not reflected on the consolidated statement of financial condition.

Fair Value of Financial Instruments

Financial instruments and other inventory positions owned and financial instruments and other inventory positions sold, but not yet purchased, on our consolidated statement of financial condition consist of financial instruments recorded at fair value. Securities (both long and short) are recognized on a trade-date basis.

Fair Value Hierarchy

FASB Accounting Standards Codification Topic 820, "Fair Value Measurements and Disclosures," ("ASC 820") provides a definition of fair value, establishes a framework for measuring fair value, establishes a fair value hierarchy based on the inputs used to measure fair value and enhances disclosure requirements for fair value measurements. ASC 820 maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the observable inputs be used when available. Observable inputs are inputs that market participants would use in pricing the asset or liability based on market data obtained from independent sources. Unobservable inputs reflect management's assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The hierarchy is broken down into three levels based on the transparency of inputs as follows:

Level I – Quoted prices (unadjusted) are available in active markets for identical assets or liabilities as of the report date. A quoted price for an identical asset or liability in an active market provides the most reliable fair value measurement because it is directly observable to the market. The type of financial instruments included in Level I are highly liquid instruments with quoted prices such as equities listed in active markets, certain U.S. treasury bonds, money market securities and certain firm investments.

Level II – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the report date. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value have been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Instruments which are generally included in this category are taxable municipal securities, U.S. government agency securities, tax-exempt municipal securities, certain corporate bonds, certain short-term municipal securities, certain asset-backed securities and certain convertible securities.

Level III – Instruments that have little to no pricing observability as of the report date. These financial instruments do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation. Instruments included in this category generally include certain asset-backed securities, certain convertible securities, certain corporate bonds, certain short-term municipal securities and certain firm investments.

Valuation of Financial Instruments

The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. When available, the Company values financial instruments at observable market prices, observable market parameters, or broker or dealer prices (bid and ask prices). In the case of financial instruments transacted on recognized exchanges, the observable market prices represent quotations for completed transactions from the exchange on which the financial instrument is principally traded.

A substantial percentage of the fair value of the Company's financial instruments and other inventory positions owned and financial instruments and other inventory positions sold, but not yet purchased, are based on observable market prices, observable market parameters, or derived from broker or dealer prices. The availability of observable market prices and pricing parameters can vary from product to product. Where available, observable market prices and pricing or market parameters in a product may be used to derive a price without requiring significant judgment. In certain markets, observable market prices or market parameters are not available for all products, and fair value is determined using techniques appropriate for each particular product. These techniques involve some degree of judgment. Results from valuation models and other techniques in one period may not be indicative of future period fair value measurements.

For investments in illiquid or privately held securities that do not have readily determinable fair values, the determination of fair value requires the Company to estimate the value of the securities using the best information available. Among the factors considered by the Company in determining the fair value of such financial instruments are the cost, terms and liquidity of the investment, the financial condition and operating results of the issuer, the quoted market price of publicly traded securities with similar quality and yield, and other factors generally pertinent to the valuation of investments. In instances where a security is subject to transfer restrictions, the value of the security is based primarily on the quoted price of a similar security without restriction but may be reduced by an amount estimated to reflect such restrictions. In addition, even where the value of a security is derived from an independent source, certain assumptions may be required to determine the security's fair value. For instance, the Company assumes that the size of positions in securities that the Company holds would not be large enough to affect the quoted price of the securities if the firm sells them, and that any such sale would happen in an orderly manner. The actual value realized upon disposition could be different from the currently estimated fair value.

Fixed Assets

Fixed assets include furniture and equipment, software and leasehold improvements. Depreciation of furniture and equipment and software is provided using the straight-line method over estimated useful lives of three to ten years. Leasehold improvements are amortized over their estimated useful life or the life of the lease, whichever is shorter. Additionally, certain costs incurred in connection with internal-use software projects are capitalized and amortized over the expected useful life of the asset, generally three to seven years.

Leases

The Company leases its corporate headquarters and other offices under various non-cancelable leases. The leases require payment of real estate taxes, insurance and common area maintenance, in addition to rent. The terms of the Company's lease agreements generally range up to 10 years. Some of the leases contain renewal options, escalation clauses, rent free holidays and operating cost adjustments.

For leases that contain escalations and rent-free holidays, the Company recognizes the related rent expense on a straight-line basis from the date the Company takes possession of the property to the end of the initial lease term. The Company records any difference between the straight-line rent amounts and amounts payable under the leases as part of other liabilities and accrued expenses.

Cash or lease incentives received upon entering into certain leases are recognized on a straight-line basis as a reduction of rent expense from the date the Company takes possession of the property or receives the cash to the end of the initial lease term. The Company records the unamortized portion of lease incentives as part of other liabilities and accrued expenses.

Goodwill

Goodwill represents the excess of purchase price over the fair value of net assets acquired using the purchase method of accounting. The recoverability of goodwill is evaluated annually, at a minimum, or on an interim basis if events or circumstances indicate a possible inability to realize the carrying amount. The evaluation includes assessing the estimated fair value of the Company's reporting unit based on market prices for similar assets, where available, the Parent Company's market capitalization and the present value of the estimated future cash flows associated with the reporting unit. We have completed our annual assessment of goodwill as of November 30, 2009, and no impairment was identified.

Other Receivables

Other receivables include management fees receivable, accrued interest and loans made to revenue-producing employees, typically in connection with their recruitment. Employee loans are forgiven based on continued employment and are amortized using the straight-line method over the respective terms of the loans, which generally range up to three years.

Other Assets

Other assets include net deferred tax assets, prepaid expenses, intercompany receivables and proprietary investments. The Company's investments include investments in private companies, partnerships, bridge-loan financings and investments to fund deferred compensation liabilities.

Income Taxes

Deferred tax assets and liabilities are recognized for the expected future tax consequences attributable to temporary differences between amounts reported for income tax purposes and financial statement purposes, using current tax rates. A valuation allowance is recognized if it is anticipated that some or all of a deferred tax asset will not be realized. Tax reserves for uncertain tax positions are recorded in accordance with FASB Accounting Standards Codification Topic 740, "Income Taxes," ("ASC 740").

NOTE 3. RECENT ACCOUNTING PRONOUNCEMENTS

Adoption of New Accounting Standards

Accounting for Transfers of Financial Assets

In June 2009, the FASB issued guidance amending the Accounting Standards Codification Topic 860, "Transfers and Servicing," ("ASC 860") designed to improve the relevance, representational faithfulness, and comparability of the information that a reporting entity provides in its statement of financial condition about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. Additionally, the new guidance eliminates the qualifying special-purpose entity ("QSPE") concept. The updates were effective for the Company January 1, 2010. The recognition and measurement provisions were effective for prospective transfers with the exception of existing QSPEs which must be evaluated at the time of adoption. The disclosures required by ASC 860 are applied to both retrospective and prospective transfers. The adoption of ASC 860 did not have an impact on the Company's consolidated statement of financial condition.

Consolidation of Variable Interest Entities

In June 2009, the FASB updated the accounting standards related to the consolidation of variable interest entities ("VIE"). The standard requires, among other things, a qualitative rather than quantitative analysis to determine the primary beneficiary ("PB") of the VIE, continuous assessments of whether the entity is the PB of the VIE, and enhanced disclosures about involvement with VIEs. This standard was effective for the Company January 1, 2010 and is applicable to all entities with which the enterprise has involvement, regardless of when that involvement arose. The adoption of the new standard did not have an impact on the Company's consolidated statement of financial condition.

In February 2010, the FASB issued ASU 2010-10, which addresses the application of the amendments to VIE consolidation described above by reporting entities in the asset management industry by deferring the effective date of the standard's new recognition and measurement requirements for certain investment funds. However, the standard's new disclosure requirements will continue to apply to all entities. ASU 2010-10 was effective January 1, 2010. The Company did not have any investment funds within the scope of ASU 2010-10 that qualified for the deferral.

Fair Value Measurements

In January 2010, the FASB issued ASU No. 2010-06, "Improving Disclosures about Fair Value Measurements," ("ASU 2010-06") amending FASB Accounting Standards Codification Topic 820, "Fair Value Measurements and Disclosures" ("ASC 820"). The amended guidance requires entities to disclose additional information regarding assets and liabilities that are transferred between levels of the fair value hierarchy and to disclose information in the Level III rollforward about purchases, sales, issuances and settlements on a gross basis. ASU 2010-06 also further clarifies existing guidance pertaining to the level of disaggregation at which fair value disclosures should be made and the requirements to disclose information about the valuation techniques and inputs used in estimating Level II and Level III fair value measurements. The guidance in ASU 2010-06 was effective for the Company January 1, 2010, except for the requirement to separately disclose purchases, sales, issuances, and settlements on a gross basis in the Level III rollforward, which becomes effective for fiscal years (and for interim periods within those fiscal years) beginning after December 15, 2010. While the adoption of ASU 2010-06 did not change accounting requirements, it did impact the Company's disclosures about fair value measurements.

NOTE 4. FINANCIAL INSTRUMENTS AND OTHER INVENTORY POSITIONS OWNED AND FINANCIAL INSTRUMENTS AND OTHER INVENTORY POSITIONS SOLD, BUT NOT YET PURCHASED

Financial instruments and other inventory positions owned and financial instruments and other inventory positions sold, but not yet purchased at June 30, 2010, were as follows:

(Dollars in thousands)	
Financial instruments and other inventory positions owned:	
Corporate securities:	
Equity securities	$ 10,562
Convertible securities	43,067
Fixed income securities	122,397
Municipal Securities:	
Taxable securities	197,422
Tax-exempt securities	140,219
Short-term securities	51,741
Asset-backed securities	70,871
U.S. government agency securities	156,668
U.S. government securities	11,740
	$ 804,687
Financial instruments and other inventory positions sold, but not yet purchased:	
Corporate securities:	
Equity securities	$ 11,161
Convertible securities	2,905
Fixed income securities	72,551
Asset-backed securities	9,964
U.S. government agency securities	140,156
U.S. government securities	220,354
	$ 457,091

At June 30, 2010, financial instruments and other inventory positions owned in the amount of $408.6 million had been pledged as collateral for the Company's repurchase agreements, secured borrowings and securities loaned.

Inventory positions sold, but not yet purchased represent obligations of the Company to deliver the specified security at the contracted price, thereby creating a liability to purchase the security in the market at prevailing prices. The Company is obligated to acquire the securities sold short at prevailing market prices, which may exceed the amount reflected on the consolidated statement of financial condition. The Company economically hedges changes in market value of its financial instruments and other inventory positions owned utilizing inventory positions sold, but not yet purchased, futures and exchange-traded options.

NOTE 5. FAIR VALUE OF FINANCIAL INSTRUMENTS

The Company records financial instruments and other inventory positions owned and financial instruments and other inventory positions sold, but not yet purchased at fair value on the consolidated statement of financial condition.

The degree of judgment used in measuring the fair value of financial instruments generally correlates to the level of pricing observability. Pricing observability is impacted by a number of factors, including the type of financial instrument, whether the financial instrument is new to the market and not yet established and other characteristics specific to the instrument. Financial instruments with readily available active quoted prices for which fair value can be measured generally will have a higher degree of pricing observability and a lesser degree of judgment used in measuring fair value. Conversely, financial instruments rarely traded or not quoted will generally have less, or no, pricing observability and a higher degree of judgment used in measuring fair value.

The following is a description of the valuation techniques used to measure fair value.

Cash Equivalents

Cash equivalents include highly liquid investments with original maturities of 90 days or less. Actively traded money market funds are measured at their net asset value and classified as Level I.

Financial Instruments and Other Inventory Positions Owned

Equity securities – Equity securities are valued based on quoted prices from the exchange for identical assets or liabilities as of the report date. To the extent these securities are actively traded and valuation adjustments are not applied, they are categorized as Level I.

Convertible securities – Convertible securities are valued based on observable trades, when available. Accordingly, these convertible securities are categorized as Level II. When observable price quotations are not available, fair value is determined based upon model-based valuation techniques with observable market inputs, such as specific company stock price and volatility and unobservable inputs such as option adjusted spreads. These instruments are categorized as Level III.

Corporate fixed income securities – Fixed income securities include corporate bonds which are valued based on recently executed market transactions, pricing service data from external providers when available or broker quotes. Accordingly, these corporate bonds are categorized as Level II. When observable price quotations are not available, fair value is determined based upon model-based valuation techniques with observable inputs such as specific security contractual terms and yield curves and unobservable inputs such as credit spreads. These instruments are categorized as Level III.

Taxable municipal securities – Taxable municipal securities are valued using recently executed observable trades or market price quotations and therefore are generally categorized as Level II.

Tax-exempt municipal securities – Tax-exempt municipal securities are valued using recently executed observable trades or market price quotations and therefore are generally categorized as Level II.

Short-term municipal securities – Short-term municipal securities include auction rate securities, variable rate demand notes, and other short-term municipal securities. Auction rate securities were historically traded and valued as floating rate notes, priced at par due to the auction mechanism. Beginning in 2008, the auction rate securities market experienced dislocation due to uncertainties in the credit markets. During 2009, certain areas of the auction rate market began to function; however, lower credit issuers remain illiquid. Accordingly, auction rate securities with limited liquidity are valued based upon internal models with observable inputs such as specific security contractual terms and yield curves and unobservable inputs such as yield curves and liquidity discounts. These instruments are categorized as Level III. Variable rate demand notes and other short-term municipal securities are valued using recently executed observable trades or market price quotations and therefore categorized as Level II.

Asset-backed securities – Asset-backed securities are valued using observable trades, when available. Certain asset-backed securities are valued using models where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data. These asset-backed securities are categorized as Level II. Other asset-backed securities, which are principally collateralized by aircraft and have experienced low volumes of executed transactions, result in less observable transaction data. These assets are valued using cash flow models that utilize unobservable inputs including airplane lease rates, aircraft valuation, trust costs, and other factors impacting security cash flows. The Company's aircraft asset-backed securities had a weighted average yield of 9.6% at June 30, 2010. The Company also has a minimal amount of asset-backed securities collateralized by residential mortgages. These are valued using cash flow models that utilize unobservable inputs including credit default rates ranging from 6–10%, prepayment rates ranging from 4–8% of CPR, severity ranging from 50–80% and valuation yields ranging from 7–9%. These asset-backed securities are categorized as Level III.

U.S. government agency securities – U.S. government agency securities include agency debt bonds and mortgage bonds. Agency debt bonds are valued by using either direct price quotes or price quotes for comparable bond securities and thus, are categorized as Level II. Mortgage bonds include mortgage bonds, mortgage pass-through securities and agency collateralized mortgage-obligations ("CMO"). Mortgage pass-through securities and CMO securities are valued using recently executed observable trades or other observable inputs, such as prepayment speeds and therefore, generally are categorized as Level II. Mortgage bonds are valued using observable market inputs, such as market yields ranging from 95–165 basis point spreads to treasury securities, or models based upon prepayment expectations ranging from 222–454 Public Securities Association ("PSA") prepayment levels. These securities are categorized as Level II.

U.S. government securities – U.S. government securities include highly liquid U.S. treasury securities which are generally valued using quoted prices and therefore categorized as Level I.

Investments

The Company's investments valued at fair value include investments in public companies, warrants of public or private companies and investments in certain illiquid municipal bonds. Investments in public companies are valued based on quoted prices on active markets and reported in Level I. Company-owned warrants, which have a cashless exercise option, are valued using the Black-Scholes option-pricing model and reported as Level III assets. Investments in certain illiquid municipal bonds that the Company is holding for investment are reported as Level III assets.

The following table summarizes the valuation of our financial instruments by pricing observability levels defined in ASC 820 as of June 30, 2010:

(Dollars in thousands)	Level I	Level II	Level III	Total
Assets:				
Financial instruments and other inventory positions owned:				
Corporate securities:				
Equity securities	$ 10,562	$ -	$ -	$ 10,562
Convertible securities	-	31,896	11,171	43,067
Fixed income securities	-	118,801	3,596	122,397
Municipal securities:	-			
Taxable securities	-	197,422	-	197,422
Tax-exempt securities	-	140,219	-	140,219
Short-term securities	-	48,216	3,525	51,741
Asset-backed securities	-	46,534	24,337	70,871
U.S. government agency securities	-	156,668	-	156,668
U.S. government securities	11,740	-	-	11,740
Total financial instruments and other inventory positions owned:	22,302	739,756	42,629	804,687
Cash equivalents	5,548	-	-	5,548
Investments	993	-	2,012	3,005
Total assets	$ 28,843	$ 739,756	$ 44,641	$ 813,240
Liabilities:				
Financial instruments and other inventory positions sold, but not yet purchased:				
Corporate securities:				
Equity securities	$ 11,161	$ -	$ -	$ 11,161
Convertible securities	-	2,905	-	2,905
Fixed income securities	-	72,542	9	72,551
Asset-backed securities	-	9,669	295	9,964
U.S. government agency securities	-	140,156	-	140,156
U.S. government securities	220,354	-	-	220,354
Total financial instruments and other inventory positions sold, but not yet purchased:	231,515	225,272	304	457,091
Investments	-	-	19	19
Total liabilities	$ 231,515	$ 225,272	$ 323	$ 457,110

The Company's Level III assets were $44.6 million, or 5.5 percent of financial instruments measured at fair value at June 30, 2010.

Some of the Company's financial instruments are not measured at fair value on a recurring basis, but are recorded at amounts that approximate fair value due to their liquid or short-term nature. Such financial assets and financial liabilities include cash, securities either purchased or sold under agreements to resell, receivables and payables either from or to customers and brokers, dealers and clearing organizations and short-term financings.

NOTE 6. VARIABLE INTEREST ENTITIES

In the normal course of business, the Company periodically creates or transacts with entities that are investment vehicles organized as limited partnerships or limited liability companies. These entities were established for the purpose of investing in equity and debt securities of public and private investments and were initially financed through the capital commitments of the members. The Company has investments in and/or acts as the managing partner or member of these entities. At June 30, 2010, the Company's aggregate net investment in these investment vehicles totaled $9.1 million. The Company's remaining capital commitments to these entities was $0.5 million at June 30, 2010.

Variable interest entities ("VIEs") are entities in which equity investors lack the characteristics of a controlling financial interest or do not have sufficient equity at risk for the entity to finance its activities. The determination as to whether an entity is a VIE is based on the amount and nature of the members' equity investment in the entity. The Company also considers other characteristics such as the power through voting rights or similar rights to direct the activities of an entity that most significantly impact the entity's economic performance. The Company has identified certain of the entities described above as VIEs. These VIEs had net assets approximating $188.9 million at June 30, 2010. The Company's exposure to loss from these VIEs is $5.4 million, which is the carrying value of its capital contributions recorded in other assets on the consolidated statement of financial condition at June 30, 2010. The Company had no liabilities related to these VIEs at June 30, 2010.

The Company is required to consolidate all VIEs for which it is considered to be the primary beneficiary. The determination as to whether the Company is considered to be the primary beneficiary is based on whether the Company has both the power to direct the activities of the VIE that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits of the VIE that could potentially be significant to the VIE. It was determined the Company is not the primary beneficiary of these VIEs and accordingly does not consolidate them.

The Company has not provided financial or other support to these VIEs that it was not previously contractually required to provide as of June 30, 2010.

NOTE 7. RECEIVABLES FROM AND PAYABLES TO BROKERS, DEALERS AND CLEARING ORGANIZATIONS

Amounts receivable from brokers, dealers and clearing organizations at June 30, 2010 included:

(Dollars in thousands)	
Receivable arising from unsettled securities transactions, net	$ 99,389
Deposits paid for securities borrowed	82,552
Receivable from clearing organizations	1,494
Deposits with clearing organizations	29,316
Securities failed to deliver	10,034
Other	10,288
Total receivables	$ 233,073

Amounts payable to brokers, dealers and clearing organizations at June 30, 2010 included:

(Dollars in thousands)	
Payable to clearing organizations	$ 5,183
Securities failed to receive	3,554
Other	20,667
Total payables	$ 29,404

NOTE 8. COLLATERALIZED SECURITIES TRANSACTIONS

The Company's financing and customer securities activities involve the Company using securities as collateral. In the event that the counterparty does not meet its contractual obligation to return securities used as collateral, or customers do not deposit additional securities or cash for margin when required, the Company may be exposed to the risk of reacquiring the securities or selling the securities at unfavorable market prices in order to satisfy its obligations to its customers or counterparties. The Company seeks to control this risk by monitoring the market value of securities pledged or used as collateral on a daily basis and requiring adjustments in the event of excess market exposure.

In the normal course of business, the Company obtains securities purchased under agreements to resell, securities borrowed and margin agreements on terms that permit it to repledge or resell the securities to others. The Company obtained securities with a fair value of approximately $329.1 million at June 30, 2010, of which $227.9 million has been either pledged or otherwise transferred to others in connection with the Company's financing activities or to satisfy its commitments under financial instruments and other inventory positions sold, but not yet purchased.

At June 30, 2010, the Company's securities sold under agreements to repurchase ("Repurchase Liabilities") exceeded 10 percent of total assets. The majority of Repurchase Liabilities at June 30, 2010, consisted of municipal obligations.

The following is a summary of Repurchase Liabilities as of June 30, 2010:

(Dollars in thousands)	Carrying Amount of Assets Sold	Repurchase Liabilities	Interest Rates
Overnight maturity	$ 202,917	$ 175,000	1.31%
On demand maturity	158,385	148,121	0%–0.95%
	$ 361,302	$ 323,121	

NOTE 9. OTHER ASSETS

Other assets include investments in public companies valued at fair value, equity and debt investments in private companies valued at cost, investments in private equity partnerships that are valued using the equity method of accounting, net deferred tax assets, prepaid expenses and intercompany receivables.

Other assets at June 30, 2010 included:

(Dollars in thousands)	
Investments at fair value	$ 3,005
Loans at cost	8,076
Investments valued using equity method	8,491
Deferred income tax asset	62,032
Prepaid expenses	5,818
Intercompany receivable	2,246
Other	2,165
Total other assets	$ 91,833

At June 30, 2010, the estimated fair market value of loans carried at cost totaled $8.1 million. The estimated fair value of loans at cost is based upon the net present value of estimated future cash flows.

NOTE 10. GOODWILL

The following table presents the changes in the carrying value of goodwill for the six months ended June 30, 2010:

(Dollars in thousands)	
Goodwill	
Balance at December 31, 2009	$ 111,051
Goodwill acquired	-
Impairment losses	-
Balance at June 30, 2010	$ 111,051

NOTE 11. SHORT-TERM FINANCING

The following is a summary of short-term financing and the weighted average interest rates on borrowings as of June 30, 2010:

(Dollars in thousands)	Outstanding Balance	Weighted Average Interest Rate
Bank lines (secured)	$ -	N/A
Commercial paper (secured)	57,069	1.28%
Total short-term financing	$ 57,069	

N/A – Not Applicable

The Company has committed short-term bank line financing available on a secured basis and uncommitted short-term bank line financing available on both a secured and unsecured basis. The Company uses these credit facilities in the ordinary course of business to fund a portion of its daily operations and the amount borrowed under these credit facilities varies daily based on the Company's funding needs.

The Company's committed short-term bank line financing at June 30, 2010, consisted of a $250 million committed revolving credit facility with U.S. Bank, N.A. Advances under this facility are secured by certain marketable securities. The unpaid principal amount of all advances under this facility will be due on September 30, 2010. The Company pays a nonrefundable commitment fee on the unused portion of the facility on a quarterly basis.

The Company's uncommitted secured lines at June 30, 2010, totaled $275 million with three banks and are dependent on having appropriate collateral, as determined by the bank agreement, to secure an advance under the line. The availability of the Company's uncommitted lines are subject to approval by the individual banks each time an advance is requested and may be denied. In addition, the Company has established arrangements to obtain financing by another broker dealer at the end of each business day related specifically to its convertible inventory.

In 2009, the Company initiated a secured commercial paper program to provide another funding source for its securities inventory. The senior secured commercial paper notes ("Series A CP Notes") are secured by the Company's securities inventory with maturities on the Series A CP Notes ranging from 27 days to 270 days from the date of issuance. The Series A CP Notes are interest-bearing or sold at a discount to par with an interest rate based on the London Interbank Offered Rate ("LIBOR") plus an applicable margin.

As part of these short-term financing arrangements, the Company is subject to various financial and operational covenants. At June 30, 2010, the Company was in compliance with all covenants related to its financing facilities.

NOTE 12. LEGAL CONTINGENCIES

The Company has been named as a defendant in various legal actions, including complaints and litigation and arbitration claims, arising from its business activities. Such actions include claims related to securities brokerage and investment banking activities, and certain class actions that primarily allege violations of securities laws and seek unspecified damages, which could be substantial. Also, the Company is involved from time to time in investigations and proceedings by governmental agencies and self-regulatory organizations. The Company has established reserves for potential losses that are probable and reasonably estimable that may result from pending and potential legal actions, investigations and regulatory proceedings.

Given uncertainties regarding the timing, scope, volume and outcome of pending and potential legal actions, investigations and regulatory proceedings and other factors, the amounts of reserves are difficult to determine and of necessity subject to future revision. Subject to the foregoing, management of the Company believes, based on its current knowledge, after consultation with outside legal counsel and taking into account its established reserves, that pending legal actions, investigations and regulatory proceedings will be resolved with no material adverse effect on the consolidated financial condition of the Company.

NOTE 13. PARENT COMPANY STOCK-BASED COMPENSATION

The Parent Company's primary stock-based compensation plan, the Incentive Plan, permits the grant of equity awards, including non-qualified stock options and restricted stock, to the Company's employees.

NOTE 14. NET CAPITAL REQUIREMENTS AND OTHER REGULATORY MATTERS

The Company is registered as a securities broker dealer with the SEC and is a member of various self regulatory organizations ("SROs") and securities exchanges. The Financial Industry Regulatory Authority ("FINRA") serves as the Company's primary SRO. Piper Jaffray is subject to the uniform net capital rule of the SEC and the net capital rule of FINRA. The Company has elected to use the alternative method permitted by the SEC rule, which requires that it maintain minimum net capital of the greater of $1.0 million or 2 percent of aggregate debit balances arising from customer transactions, as such term is defined in the SEC rule. Under its rules, FINRA may prohibit a member firm from expanding its business or paying dividends if resulting net capital would be less than 5 percent of aggregate debit balances. Advances to affiliates, repayment of subordinated debt, dividend payments and other equity withdrawals by the Company are subject to certain notification, approval and other provisions of the SEC and FINRA rules. In addition, the Company is subject to certain approval requirements related to withdrawals of excess net capital.

At June 30, 2010, net capital calculated under the SEC rule was $241.9 million, and exceeded the minimum net capital required under the SEC rule by $240.9 million.

NOTE 15. RELATED PARTY TRANSACTIONS

The Company has significant transactions with the Parent Company and the Parent Company's other subsidiaries. The Company arranges for the purchase or sale of securities, manages investments, markets derivative instruments and structures complex transactions for affiliates. Pursuant to shared services agreements, the Company records a portion of the revenues earned by affiliates in return for services provided to affiliates. Certain operating expenses, along with advances for certain investments, incurred by affiliates are initially paid by the Company and subsequently reimbursed by the affiliates. At June 30, 2010, receivables from affiliates of $2.2 million was included in other assets on the consolidated statement of financial condition, representing the amounts receivable for related party transactions.
